Right DH116 · delivered proxy76 static comparison

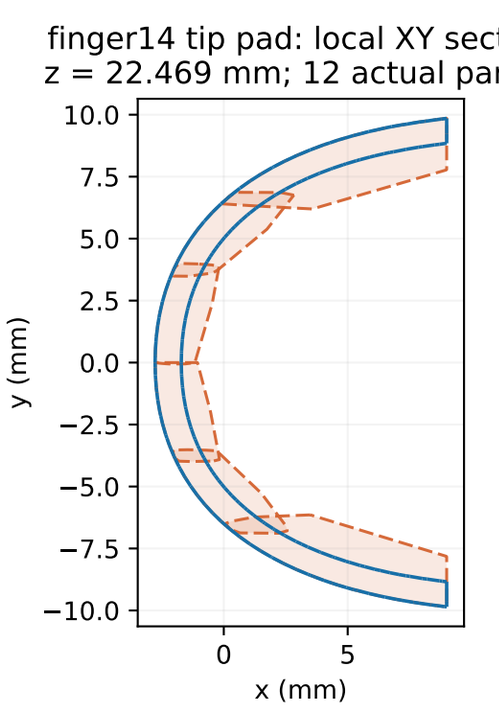

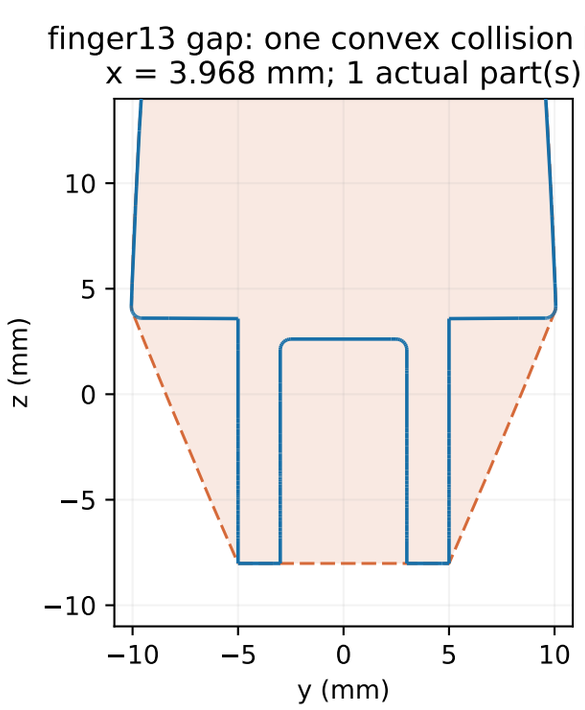

Whole-link 3D sample max: S→U 26.774 mm; U→S 11.001 mm

Whole-link 3D sample max: S→U 2.607 mm; U→S 3.203 mm

Whole-link 3D sample max: S→U 1.004 mm; U→S 1.384 mm

Whole-link 3D sample max: S→U 8.443 mm; U→S 3.672 mm

S: formal-right original source STL section
U: actual per-part convex proxy section
Proxy convex interior (overlaps retained in drawing)

Sections illustrate hinge / pad / gap geometry; individual hull outlines can include internal overlap boundaries.
Source STL surfaces are not classified as exterior/interior. 3D area-sample metrics are independent of this drawing.
Finite sample maxima are not Hausdorff bounds.
